

August 28, 1961

Mr. Wayne D. Criddle  
State Engineers Office  
Salt Lake City, Utah

Dear Mr. Criddle:

On Receipt of your letter of Aug. 10, 1961 we contacted Mr. Anderson and he informed us he had not received any information on the construction of a measuring weir and reservoir gage at Island Lake. He also stated that he could give us no technical advice on the matter. So we are writing your office for such advice..

We would like a blue print or drawing of a suitable measuring device. We would like to know what kind of reservoir gage is wanted and how to construct it. Could you also give us an estimated cost.

Sincerely yours,

*Albert Wilde*  
Interstate Canal Company

Albert Wilde
